Welcome to the 5th Anniversary of the **Russian Business Forum on cost engineering**. At this event you will see and hear about the best-in-class solutions providers for project scheduling and cost engineering that stems from the Deltek and PMSOFT partnership around the unbeatable Acumen software.

With the Acumen software, you will learn about how it easily captures the schedule, cost risk, and uncertainty in your model while quickly finding the potential impact on the project. Some of the tools within its cost engineering solution are the Deltek Project Maturity Framework tool. This framework has helped predict completion dates (and budget) to within 1.5% of actual completion on well over \$300B worth of projects. Organizations using Acumen Fuse report a time savings of more than 34 hours per project. Which equates to around 13 weeks of time savings per year on a portfolio of 15 projects. And this is all done by reporting cost and schedule risk exposure in an understandable fashion.

Please join us while we take a more in-depth look at the Acumen system and see the easy to use functionality of making sure that scheduling of projects are on time and removes redundancies to save money while giving you a better score against industry best practices.

Andy Christenson

Senior, Director of Channel Sales
